Profile

Junior Software Developer skilled in Angular, Java, Spring Boot, and SQL. Hands-on experience in Camunda BPM workflows, Formio integration, and building scalable full-stack applications. Strong in problem-solving, frontend development, API integration, and Agile practices

Professional Experience

Trinity Mobility

09/2024 – 03/2025

Intern – Full Stack Developer

Bangalore

- Developed features and fixed bugs in **Angular + Spring Boot** product.
- Integrated **Camunda BPM** workflows with Form.io for dynamic form rendering.
- Implemented backend pagination with **SQL** queries and URL parameter handling.
- Wrote unit tests for Angular components and services, ensuring code quality.
- Tested and validated backend APIs using **Postman** to ensure smooth integration.
- Collaborated in Agile team, used **Jira** for task tracking, and **Jenkins** for deployments.

Education

SSLC

2018

Indian International School

83.20%

PUC

2018 – 2020

Mahesh PU College

75.5%

Information Science and Engineering

2020 – 2024

AMC College of Engineering, Bangalore

7.58CGPA

Technical Skills

Frontend Development

Angular, TypeScript, JavaScript, HTML, CSS

Backend

Java, Spring Boot, REST APIs, Hibernate

Database

MySQL, MSSQL

Tools

Git/GitHub, Jenkins, Postman, Jira

Workflow Automation

Camunda BPM, BPMN Workflows, Form.io 

Other

Python (Pandas, NumPy, Matplotlib), Power BI, Agile

Projects

Employee management system

Full-Stack Developer Spring Boot, Angular, MSSQL

- Developed a CRUD-based employee management system with Angular frontend and Spring Boot backend.
- Integrated MSSQL for persistent data storage and efficient retrieval of employee records.
- Enabled user-friendly forms for creating, reading, updating, and deleting employee profiles.
- Focused on modular code structure for easy scalability and testing.

Phishing Detection using Machine Learning

Python Developer ML Algorithms, Feature Engineering

- Built a classification system to differentiate between legitimate and phishing URLs.
- Trained models using supervised learning algorithms like Decision Trees and RandomForest.
- Preprocessed web-based features such as domain structure, SSL usage, and link behavior.
- Evaluated accuracy across datasets and optimized model performance for real-time detection.

Bad Posture Detection Web Application

Flask, React, MediaPipe, OpenCV

- Built a web app to detect poor posture (squats & desk sitting) using webcam/video input with real-time feedback.
- Implemented pose estimation with Flask backend (MediaPipe, OpenCV) and React frontend for live video capture & visualization.
- Enabled REST APIs with CORS for seamless frontend-backend integration.

Internship

- MySQL, Java, HTML, CSS in Jspider
- Full Stack Web Development with Comsoft Technology
- InternPro – AICTE Government Internship (Ongoing)

Certificates

NCASTEM 2024

Issued by T.Jhon Group of Institutions

Basics of Python (AIML)

Issued by Comsoft Technologies

Java Full Stak Web Development

Issued by Jspiders BTM Bangalore

Employability Skill Development Training Program

Issued by Seventh Sense Talent Solutions
